(57) Abstract: Apparatus for creating a number of display im-

vided with a number of display surfaces, in which the mount-  
ing means are arranged such that they define a shape with sub-  
stantially straight edges, and in which two or more second ro-  
tating elements can combine to create a changeable display  
surface substantially parallel to each substantially straight edge  
of said shape, and in which in use each second rotating element  
is rotated independently of all other second rotating elements.
